

Experiment: EliteFitness– Fitness Tracker Wireframe

1. Aim

To design a simple mobile app wireframe for a fitness tracker application called **Elite Fitness** using Balsamiq.

2. Objective

- To create a basic mobile UI for workout tracking
- To design simple screens with clear navigation
- To represent user flow using a storyboard

3. Tools Used

- **Balsamiq Wireframes**

4. Description

FitTrack is a fitness tracking app that helps users:

- Plan workouts
- Track exercises
- Monitor progress

5. Screens Included

1. **Login Screen**
 - Email and password fields
 - Login button
2. **Dashboard Screen**
 - Shows workout summary
 - Displays basic fitness stats
3. **Workout Plan Screen**

- List of workout routines
- User can select a plan
- 4. **Exercise Tracking Screen**
 - Shows exercises with sets and reps
 - Track ongoing workout
- 5. **Progress Screen**
 - Displays progress using bars
 - Shows improvement over time

6. User Flow

Login → Dashboard → Workout Plan → Exercise Tracking → Progress

Arrows are used in the storyboard to show this flow.

7. Features

- Simple and clean design
- Easy navigation
- Workout tracking structure
- Progress visualization
